Original Copy of Blades on Printers' Tokens & Medals

30 Blades, William. **A LIST OF MEDALS, JETTONS, TOKENS, &C. IN CONNECTION WITH PRINTERS AND THE ART OF PRINTING.** London, 1869. First edition. Small 8vo [18 by 11.5 cm], original blue cloth; sides paneled in blind; covers and spine lettered and decorated in gilt, including an impression of a printing press. (2), xv, (1), 128 pages; title printed within an attractive lithographic border; 96 well-engraved plates. Bound in after the last plate is a *Desiderata* leaf printed on regular stock, followed by four identical perforated *Desiderata* leaves printed on tinted tissue stock, and an oversized four-page French *Prospectus* for *Numismata Typographica* folded and bound in. Inscribed but not signed by the author opposite the title page. Binding a bit worn, especially at spine, with closed tears to cloth. Very good or better. **\$750**

Very rare. Blades (1824-90), was a noted printing historian and was also one of the best known and respected English printers of his time. This underappreciated work was a pioneering effort and, the author notes, was issued "as a forerunner of a similar work on a more extended scale... Another reason for publishing now is the hope that the very imperfections of this list may tend to the greater perfection of that to come, by drawing attention to Medals at present untraceable or unknown." The limitation leaf following the title states: "This Edition consists of 100 copies only, of which 25 are upon Fcap. 4to., and 75 upon Fcap. 8vo. Not printed for Sale." The work is very difficult to find today and it seems likely that a substantial percentage of the edition has not survived. This copy is inscribed "Chas. Kinloch, Esq. with the Author's kind regards." Grierson 257 (mis-dated 1969).

Comprehensive and indispensable, this enduring work provides valuable information on coin and medal engravers and their work from ancient to modern times. Printed on high acid content paper and bound in half leather that is now often fragile, the original edition is generally usable only with great care. A most handsome production, apparently published to promote pure nickel coinage. According to the foreword: "The term 'nickel' used throughout this book refers to the metal in its maximum state of purity (99.+) obtainable commercially in rolled form. Twenty-nine countries have issued Nickel coinage... This book contains facsimiles of the Nickel coins issued up to December 1936 with brief descriptions and dates of issue." Sigler 1371.

One of the most handsomely produced of all eighteenth-century works on numismatics. Johann Karl Hedlinger (1691–1771) was a Swiss medalist known mainly for his historical medals, many of which he executed as medalist of the court at Stockholm. Having previously worked as a goldsmith and in the Lucerne, Paris and Stockholm mints, he ended up serving as chief engraver of the Stockholm Mint for much of his career. Chretien de (Christian von) Mechel (1737–1817) was a highly skilled Swiss engraver; being “graveur de S.A.S. Monseigneur l'Électeur Palatin et membre de diverses académies,” according to the 1778 title page. His

work on Hedlinger medals is one of his finest efforts, and is generally encountered as here, with a 1778-dated text volume married to a 1776-dated plate volume. Forrer devotes a dozen pages and several illustrations to Hedlinger, citing de Mechel's work in the bibliography, and terming Hedlinger "one of the foremost Medallists of the eighteenth century."
